Beginner's Solution Method. In case you have never solved a Rubik's Cube before here's the easiest solution method for beginners. To solve the puzzle we need to rotate the faces, so let's mark them with letters: F(front) , R(right), L(left), D(down). A letter alone means a clockwise rotation while reverse turns are marked with an apostrophe (F') and double turns are marked with 2 (F2). An ...

Rubiks Cube Move notations Move notations are made in order to convey a sequence of moves through writing. When describing the solution we'll use the following move notations (traditional move notations). Here is how it works- every face given a letter: F (front): the front face (facing the solver) B (back): the back face (opposite to the front ...

[How to solve a Rubik's Cube | The ultimate beginner's guide](#)

Most beginner solution methods involve solving the cube one layer at a time, using algorithms that preserve what has already been solved. The easiest layer by layer methods require only 3–8 algorithms. In 1981, thirteen-year-old Patrick Bossert developed a solution for solving the cube, along with a graphical notation, designed to be easily understood by novices. It was subsequently ...

[Solve the Cube - You CAN Do the Rubiks Cube](#)

The cross is the first step in the actual solution of the puzzle. This step can be a bit confusing at first, so make sure you read this a few times whilst attempting it yourself. The image shows the end goal of this step. The centre pieces on each face, as you may have noticed from playing around with the cube, can't be moved to another spot, only rotated. So we can use this to our advantage ...
