Such impression management, Goffman wrote, also guides social interaction in everyday life. When people interact, they routinely try to convey a positive impression of themselves to the people with whom they interact. Our behavior in a job interview differs dramatically (pun intended) from our behavior at a party. The key dimension of social interaction, then, involves trying to manage the ...

Other researchers who were influenced by the principles of Gestalt psychology including Kurt Lewin and Kurt Goldstein went on to make important contributions to psychology. The idea that the whole is different than its parts has played a role in other areas including our understanding of the brain and social behavior.

[History and Key Concepts of Behavioral Psychology](#)

Reinforcement of the behavior means that the goal is to get your subject — whether pet or person — to do more of a desired behavior. Positive reinforcement means giving something to the subject when they perform the desired action so they associate the action with the reward and do it more often. The reward is a reinforcing stimulus. Positive reinforcement works because the brain connects ...
